FONTS

A copy of all fonts used in your file must be included with your ad. If a font is not included and a copy is not on file, the closest font we have will be substituted.

PHOTOSHOP

To accurately separate color photographs, these files must be converted to CMYK mode. If saved as a TIFF file, be sure that LZW compression is not selected. If you have a clipping path in your file, it needs to be saved as an EPS, with DCS separation function off. For quality reproduction, all color files should be 300 dpi, halftones at 300 dpi, and line art should be at least 600 dpi. Also, Photoshop files should not be enlarged or reduced more than 120% once placed into layout program file.
